

Logistics Technician

An interesting full-time vacancy has arisen at the Woolcock Institute of Medical Research (WIMR) for a Logistics Technician.

The WIMR is a world-renowned medical research institute focusing on the causes, prevention, diagnosis and treatment of respiratory disease and sleep disorders.

The position is within our Diagnostic Services Department and will be located at our new purpose-built research centre in Glebe, to which we are re-locating during May. The Diagnostic Services will include a state-of-the-art 8-bed polysomnographic unit, as well as a 6-bed long-term intensive monitoring facility.

This position will provide an excellent and unique opportunity for the right person to enter the challenging and rewarding environment of sleep research.

Primary accountabilities:

- Verifying medical or research orders for testing and assisting in the preparation of medical/research records,
- Performing portable diagnostic testing (including domiciliary evaluation of flow limitation and actigraphy) and related diagnostic services under direct supervision,
- Setting up and cleaning of equipment as directed,
- Promoting the image of the Woolcock and marketing its services.

The position requires a self-motivated and organised individual who has a demonstrated proficiency with computers and/or other technically complex devices.

Proficiency with MS Office, statistical software and database tools is also required.

A degree, diploma or certificate in a health related area and prior experience in a commercial sleep diagnostics setting will be highly regarded..

Remuneration will be negotiated to attract the most suitable applicant and generous salary packaging will also be offered.

• Initial enquiries can be directed to Mr George Dungan on telephone 0423 619 902 or email gdungan@woolcock.org.au.

• Applications are to be made via email to the Human Resources Officer, Mr Chris Burke chrisb@woolcock.org.au by 18th April 2008.
