CPAP Therapy Services at the Woolcock Clinic

THE WOOLCOCK THERAPY CENTRE (WTC)

The Woolcock Therapy Centre is part of the Woolcock Institute of Medical Research. Our highly experienced and knowledgeable staff are experts in continuous positive airway pressure (CPAP) therapy. They work closely with our sleep and respiratory medical specialists to ensure our patients receive high-quality care throughout their CPAP journey.

OUR TEAM

Shweta Naik, Customer Service Officer

Shweta is your main contact within the WTC, as she coordinates patient bookings for CPAP appointments. Shweta is a highly valued team member with a wealth of knowledge and is also actively involved in WTC's financial operations.

Gagan Kaur, CPAP Therapist

Gagan is a caring soul for whom patient care is always the highest priority. She has been providing the best level of patient care within the Woolcock for more than 11 years, working previously within the Sleep and Circadian Research Group. A valuable member of the WTC since its inception.

Eliza Olszewska, CPAP Therapist

Eliza has a background in sleep with extensive experience as a Sleep Technician across multiple sites in Sydney. She has been a member of the Woolcock Sleep and Respiratory Group for nine years and has worked in the WTC since the start. She is very proud to work with a team of sleep specialists who provide outstanding patient care.

Samer Faris, CPAP Therapist

Samer is an exercise and sport science graduate, currently studying for his Honours degree in sleep regularity. He joined the WTC in January 2022 and brings clinical experience in respiratory and sleep medicine to his CPAP therapy role.

Annette Truong, CPAP Therapist

Annette has 12 years' experience in CPAP therapy and sleep diagnostic studies. She has a strong interest in a holistic approach to health and is passionate about her sleep and everyone else's. She loves the Woolcock's long-standing culture of "caring for our patients".

OUR SERVICES

The Woolcock Therapy Centre provides a wide range of CPAP therapy services. Many are complementary to other services provided at the Woolcock Clinic and Woolcock Sleep Lab. Studies conducted by the Woolcock's research groups are free of charge.

We also provide maintenance and troubleshooting of CPAP equipment for both internal and external patients, in addition to rental and sales of medical equipment that attracts a fee for our service.

Please refer to our basic price guide overleaf for more information.

We work with leading CPAP manufacturers: Resmed, Fisher and Paykel and Philips. We

provide independent advice, tailored to the patient's individual needs and comfort.

We pride ourselves on having a very high success rate with establishing new patients on CPAP treatment. Every patient starting a CPAP trial is booked for at least two follow-up appointments to check on their progress.

We also provide remote access with all of our trial machines to help resolve any problems you may have, provide guidance and facilitate remote settings changes throughout the whole process. Additional appointments will be made if patients need to be seen at the Woolcock Clinic.

The standard trial includes two weeks on variable pressure, followed by two weeks on the set pressure settings. Usually, a successful CPAP trial ends up with the patient purchasing their own device. If a patient is not compliant, we always encourage them to see the treating physician for further advice.

Around 60-70 percent of patients who start their CPAP trial with us have successful outcomes. As compliance is the key to success, we follow up all patients every six to twelve months.

HOW TO MAKE A PATIENT BOOKING

There are many ways to book your patient with the Woolcock Therapy Centre.

- If you'd like your patient to see us on the day of their follow-up appointment with the specialist, please reach out to our CPAP therapists.
- Send a referral via email to woolcock.therapycentre@sydney.edu.au
- Contact Woolcock Reception, either in person or via email woolcock.reception@sydney.edu.au

We look forward to working with you and assisting your patients.
